Previous scholarship has examined the integration of Chinese overseas, especially the early migrants, into local society, economy, and politics. At the same time, scholars found Chinese overseas often managed to maintain identities distinguishable from the mainstream and other ethnic groups. They also built various transnational networks outside of China, sometimes for cultural reasons and other times for instrumental values. The ISSCO 2023 Conference aims to revisit issues of integration, identities, and global connectivity of Chinese overseas, particularly the newcomers, with the following three **subthemes**:

1. *Socio-political and Economic Participations of Chinese Overseas in Different Countries*
2. *Being Chinese under the Shadow of the Covid-19 Pandemic*
3. *Chinese Temple Networks in Southeast Asia and Beyond*
